Performance and Reliability

Lift Capacity and Stability

The Arjo Sara 3000 is rated to handle patients weighing up to 300 kg (approximately 660 lbs), making it suitable for a broad patient demographic. Its design ensures stability during lifts, with a low center of gravity and a wide base that enhances balance, even when lifting heavier patients.

Durability and Maintenance

Constructed from industrial-grade materials, the lift is built for long-term use. Its hydraulic system requires minimal maintenance—primarily regular cleaning, lubrication, and inspection for leaks or damage. Unlike electric lifts, it does not rely on batteries, eliminating concerns about power failures or charging.

Routine inspections should include checking hydraulic fluid levels, inspecting wheels, and ensuring locking mechanisms function properly. The lift's straightforward design facilitates quick troubleshooting and repairs.
