Common Review Questions and Answer Key

Question 1: What defines the biosphere?

Answer: The biosphere is the global sum of all ecosystems; it is the zone of life on Earth that includes all living organisms and their interactions with the physical environment (lithosphere, hydrosphere, atmosphere).

Question 2: How do autotrophs differ from heterotrophs?

Answer: Autotrophs can produce their own food using sunlight or inorganic chemicals through processes like photosynthesis or chemosynthesis. Heterotrophs rely on consuming other organisms

for energy and nutrients.
