Founding and Early Innovation

The saga of Harley Davidson begins in 1903 in Milwaukee, Wisconsin, when William S. Harley and Arthur Davidson, along with William Davidson (Arthur's brother), founded the Harley-Davidson Motor Company. Their initial goal was to create a small engine capable of fitting into a bicycle, aiming to offer a new dimension of mobility. The first prototype, a simple 2.5-horsepower engine mounted on a bicycle frame, marked the inception of what would become a legendary brand.

In its early years, Harley Davidson focused on designing robust, reliable, and powerful motorcycles that could withstand the rigors of rugged terrain and demanding users. The company's commitment to engineering excellence and durability set it apart from competitors. By 1905, Harley Davidson produced its first 11 motorcycles, signaling the beginning of mass production.

During the pre-World War I years, Harley Davidson expanded rapidly, establishing itself as a major player in the motorcycle industry. The company innovated with features like the V-twin engine—an engine configuration that would become a signature of Harley Davidson bikes—introduced in 1909. The V-twin not only provided increased power but also contributed to the brand's distinctive sound.

and aesthetic.
