Development and Pre-Production

Origins and Conceptualization

Following the monumental success of Jurassic Park, Universal Pictures and director Steven Spielberg quickly moved to develop a sequel. The initial concept was based on Michael Crichton's novel The Lost World, which served as the primary source material. The story was envisioned to expand on the dinosaur universe, exploring a second island with dinosaurs untouched by human interference.

Key aspects of development included:

- Revisiting the core themes of chaos theory and nature's unpredictability.
- Expanding the scope from a single island to multiple locations.
- Introducing new dinosaur species to enhance visual variety and storytelling depth.

Script Development

The screenplay underwent multiple revisions to balance action, character development, and technological realism. Notable points include:

- The integration of new characters, such as Dr. Ian Malcolm, played by Jeff Goldblum, who was also a central figure in the first film.

- The inclusion of an expedition to the dinosaur-inhabited island to explore themes of corporate greed and ecological impact.
- Emphasis on suspenseful sequences involving dinosaur encounters and survival scenarios.

Design and Visual Effects
