Understanding the Mitsubishi Canter Rear Drum Brake System

What Are Rear Drum Brakes?

Rear drum brakes are a type of braking system commonly used in light trucks and older vehicles owing to their simplicity and cost-effectiveness. They consist of a drum that rotates with the wheel and brake shoes that press against the inner surface of the drum to slow or stop the vehicle.

The main components of a rear drum brake system include:

- Brake drum
- Brake shoes
- Wheel cylinder
- Return springs
- Adjuster mechanism
- Brake lining
- Hardware components (clips, pins, springs)

Why Are Accurate Diagrams Important?

A detailed diagram provides visual clarity, helping identify each part's location and function within the system. Accurate diagrams are essential for:

- Diagnosing brake issues such as uneven wear, squealing, or reduced braking effectiveness
- Performing repairs or replacements efficiently
- Understanding the assembly/disassembly process
- Ensuring correct reinstallation of components

Key Components of Mitsubishi Canter Rear Drum Brake Diagrams

1. Brake Drum

The brake drum encases the brake shoes and provides the surface against which they press to generate braking force. It's mounted on the wheel hub, rotating with the wheel.

2. Brake Shoes

Brake shoes are curved metal plates lined with friction material (brake lining). When the brakes are applied, these shoes are forced outward against the inner surface of the drum.

3. Wheel Cylinder

A hydraulic component that pushes the brake shoes outward when brake fluid is forced into it during braking.

4. Return Springs

Springs that retract the brake shoes away from the drum once the brake pedal is released, ensuring the shoes do not drag on the drum.

5. Self-Adjuster Mechanism

Maintains proper clearance between the brake shoes and drum, compensating for lining wear.

6. Brake Linings

Friction material attached to the brake shoes that contacts the drum to produce braking force.

7. Hardware Components

Includes pins, clips, and springs that hold the brake shoes and other parts in place.
