Scouting Reports:

Experienced scouts and analysts evaluate prospects across five primary tools: Hit, Power, Run, Arm, and Defense. Each tool is graded on a 20-80 scale, with 50 representing an average major leaguer. These grades reflect current abilities and project future development.

Statistical Analysis:

Advanced metrics such as strikeout rates, walk percentages, exit velocities, and pitch data supplement scout impressions. When possible, the handbook integrates data from MiLB (Minor League Baseball) and international leagues, providing a comprehensive view.

Projection and Potential:

The rankings consider not only current skill levels but also the likelihood of improvement, adjusting for age, level of competition, and injury history. The goal is to estimate a prospect's ultimate ceiling and likelihood of reaching it.

Subjectivity and Expert Judgment:

While data-driven, the process remains inherently subjective, relying on the expertise and experience of the evaluators. This blending of science and art is both a strength and a limitation, which the handbook transparently discusses.
