Understanding Cosmic Debris and Meteorites

Definitions and Classifications

Cosmic debris encompasses a broad range of extraterrestrial materials originating from space. When these fragments survive passage through Earth's atmosphere and reach the surface, they are classified as meteorites.

- **Meteorites:** Fragments of cosmic debris that have survived atmospheric entry and landed on Earth. They are the tangible remnants of asteroids, comets, or meteoroids.

- Meteoroids: Small particles traveling through space, typically less than a meter in size, which produce meteors when entering Earth's atmosphere.
